

MUHAMMAD FAISAL

SQA Engineer

mfaisalidrees88@gmail.com | +92 309 4412692 | [LinkedIn](#) | Lahore, Pakistan

PROFESSIONAL SUMMARY

Software Quality Assurance Engineer with **3 years** of experience testing **web and mobile applications** across SaaS, LIMS, FinTech, Travel, and communication platforms. Skilled in **functional, regression, smoke, sanity, UI/UX, API, end-to-end, cross-browser, cross-device, and UAT testing**. Experienced in **test case and test scenario design, defect tracking and management using Jira, API validation using Postman, and database verification using SQL**. Hands-on experience with **Playwright** for basic test automation and **JMeter** for performance testing. Experienced in **Agile** environments and collaborating with developers, business analysts, product managers, and other stakeholders throughout the software development lifecycle.

TECHNICAL SKILLS

Testing Types: Functional Testing, Manual Testing, Black-Box Testing, Regression Testing, Smoke Testing, Sanity Testing, End-to-End Testing, UAT, UI/UX Testing, Cross-Browser Testing, Cross-Device Testing, Non-Functional Testing.
API Testing: Postman, REST API Testing
Project Tools: Jira, TestLink, BrowserStack, Chrome DevTools, JMeter
Methodologies: Agile, Scrum, SDLC, STLC
Automation: Playwright

WORK EXPERIENCE

SQA Engineer | [Spadasoft Pvt Ltd](#) — Lahore, Pakistan

Nov 2025 – Present

- **Execute end-to-end manual testing** for web and mobile applications, designing and executing comprehensive **test cases and test scenarios** to validate functionality and release quality.
- Perform **functional, regression, smoke, sanity, UI/UX, cross-browser, and cross-device testing** to identify and prevent defects before production deployment.
- Created and maintained detailed **test cases, test scenarios, and test execution reports**, ensuring complete requirement traceability and test coverage.
- Performed API testing using Postman by validating **endpoints, request/response payloads, authentication, and HTTP** status codes.
- Conduct **database testing and verification using SQL** to validate data integrity, business logic, and frontend-backend data consistency.
- **Identify, document, prioritize, and track defects in Jira**, collaborating with developers, product managers, business analysts, and other stakeholders to support timely defect resolution.
- Perform **basic test automation using Playwright** to automate common test flows and complement manual testing activities.

SQA Engineer | [UpToData GmbH](#) — Remote, Germany

Mar 2024 – Nov 2025

- **Managed end-to-end manual testing** for StudyGen360, a SaaS-based laboratory management platform, covering complex business workflows across multiple application modules.
- Designed and executed **test cases and test scenarios** covering functional, regression, smoke, sanity, UI/UX, and end-to-end testing.
- **Identified, documented, prioritized, and tracked defects in Jira**, providing clear reproduction steps and supporting details to facilitate efficient defect resolution.
- Performed **API testing using Postman** and **database verification using SQL** to validate API responses, data integrity, business logic, and frontend-backend integration.
- Conducted **cross-browser and cross-device compatibility testing** across Android, iOS, and multiple browsers using **BrowserStack**, ensuring a consistent user experience before production releases.
- Collaborated with **developers and business analysts** to investigate defects, verify fixes, and support reliable software releases.
- Supported **Agile/Scrum Development** process through sprint planning, release Validation, production, sanity testing and continuous **QA** activities.

- Assisted in **manual testing** of web applications, validating core functionality and supporting quality assurance across multiple modules under senior QA guidance.
- **Designed and executed test cases** covering functional, **UI, and regression testing** based on requirements, improving early defect detection and test coverage.
- **Logged, tracked, and prioritized bugs in Jira** with clear reproduction steps, supporting faster issue resolution and collaboration with development teams. Performed basic **API testing using Postman** to validate response status and data accuracy.
- Participated in **Agile/Scrum** ceremonies including sprint planning and daily standups, aligning **QA** tasks with sprint goals and deliverables.
- Conducted **cross-browser testing** to ensure consistent functionality and UI behavior across supported browsers.

KEY PROJECTS

[Schoolify – White-Label School Management Platform](#) | SaaS

Tested a multi-tenant school management platform covering admissions, attendance, fee management, examinations, timetables, staff management, and parent communication. Performed functional, regression, API, UI/UX, and end-to-end testing while validating role-based access and business workflows.

Technology: *Next.js, supabase*

[MountSpeak – Tour Agency Management Platform](#) | Travel / SaaS

Tested a SaaS-based tour agency management platform covering tour management, bookings, customers, drivers, payments, and day-to-day agency operations. Performed functional, regression, API, responsive, cross-browser, and end-to-end testing across role-based workflows.

Technology: *Next.js, supabase*

[Native – Career Networking & Recruitment Platform](#) | HRTech / Job Portal

Tested a professional networking and recruitment platform covering candidate profiles, CV management, job applications, courses, employer job postings, and recruitment workflows. Performed functional, regression, UI/UX, API, and cross-browser testing.

Technology: *Vue.js, Laravel, MySQL, Node.js*

[Servita – Business Consultancy & Corporate Services Platform](#) | Business Services / SaaS

Tested a SaaS-based business consultancy platform supporting financial, legal, strategy, and business growth services.

Performed **functional, regression, UI/UX, API, and end-to-end testing** across core business workflows, service management, and role-based access. Validated **API responses and data integrity** to ensure reliable frontend-backend integration.

Technology: *Next.js, Node.js, Express.js, Prisma ORM, Docker, PostgreSQL*

[REFE Coins – Real Estate Tokenization Platform](#) | Blockchain / FinTech

Tested a blockchain-based real estate tokenization platform covering property tokenization, digital asset purchasing, and token trading workflows. Performed **functional, regression, API, UI/UX, and end-to-end testing** across critical transaction and marketplace flows. Validated **API responses, data integrity, and business logic** to ensure reliable and accurate transaction processing.

Technology: *react.js, Node.js, express.js, mongodb*

[StudyGen360 – Laboratory Management Platform](#) | LIMS / SaaS

Tested a SaaS-based laboratory management platform covering study management, laboratory records, test results, research activities, and compliance-related workflows. Designed and executed **functional, regression, smoke, API, cross-browser, and end-to-end testing** across multiple application modules.

Technology: *React.js, Angular, .NET (Core/6+), Java, MySQL, PostgreSQL*
